Plan A: Initial tracheal intubation plan

- Direct laryngoscopy
  - succeed: Tracheal intubation
  - failed intubation

Plan B: Secondary tracheal intubation plan

- ILMA™ or LMA™
  - succeed: Confirm - then fibreoptic tracheal intubation through ILMA™ or LMA™
  - failed oxygenation

Plan C: Maintenance of oxygenation, ventilation, postponement of surgery and awakening

- Revert to face mask
  - Oxygenate & ventilate
    - succeed: Postpone surgery
    - failed oxygenation

- Cannula cricothyroidotomy
  - Surgical cricothyroidotomy
    - increasing hypoxaemia
      - or
      - fail

Plan D: Rescue techniques for "can't intubate, can't ventilate" situation

- LMA™
  - improved oxygenation
    - Awaken patient
